Passive Rahmenantenne HFRA 5152 *Passive Magnetic TX Loop Antenna HFRA 5152*

Die passive Rahmenantenne HFRA 5152 ist zur Erzeugung definierter Magnetfelder im Frequenzbereich bis 3 MHz vorgesehen. Dabei wird eine Buchse mit dem Signalgenerator verbunden, während die andere Buchse zur Kontrolle des Rahmenstroms genutzt wird. Der Rahmenstrom wird als Spannungsabfall über dem eingebauten 20 Ohm Widerstand mit einem hochohmigen Spannungsmeßgerät ermittelt (z.B. Oszilloskop oder HF-Voltmeter). Eine gemessene Spannung von 50 mV am Kontrollausgang entspricht einem Rahmentrom von 2.5 mA. Der Rahmenstrom ist streng proportional zur erzeugten Magnetfeldstärke. In einem Abstand von 1.3 m erzeugt man bei 50 mV Kontrollspannung eine fiktive elektrische Feldstärke von 0.01 V/m. Die maximal zulässige Kontrollspannung ist 630 mV, bei höheren Werten werden die eingebauten Widerstände zerstört.

Die Umrechnung von magnetischer Feldstärke in fiktive elektrische Feldstärke ist frequenzunabhängig 51.5 dB ($=20 \log(377 \Omega)$)

The passive Loop Antenna HFRA 5152 was designed to generate well defined magnetic fields in the frequency range up to 3 MHz. The signal generator is connected to the loop antennas BNC-input, the second BNC-connector is used to monitor the RF-level using a high impedant voltmeter or an oscilloscope respectively. The loop current is measured as a voltage drop across the built-in 20 Ohm resistor. A measured voltage of 50 mV at the monitoring connector corresponds to a loop current of 2.5 mA. The loop current is strictly proportional to the generated fieldstrength. The fictious electric fieldstrength is 0.01 V/m at a distance of 1.3 m with a monitoring voltage of 50 mV. Do not exceed the max. permitted monitor voltage of 630 mV, otherwise the built-in resitors will be destroyed.

If FAR-FIELD measurements are intended in units of dB μ V/m, read the voltage level in dB μ V across 50 Ω and add the E field antenna factor k E from the table (it is 51.5 dB higher and provides the "fictitious E field level" in dB μ V/m).
